FabMob
2019

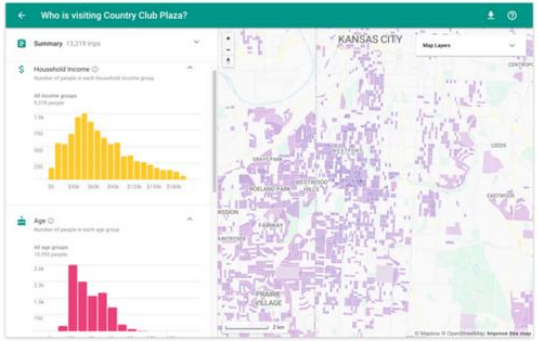
Accélérateur européen pour tous les acteurs de la mobilité

Startups, Industries, Collectivités, Laboratoires, Ecoles

LA FABRIQUE
DES MOBILITÉS

Change the way you see your city move

Replica allows you to explore how, when, and why people travel in urban areas.



Replica | An initiative of Sidewalk Labs

Applications all over the city

Traditionally travel models have been limited in both scope and accessibility. Replica can be used for both in-depth transportation planning and across many other domains.

Transportation Planning
Where should we build a light rail line?

Transit Planning and Operations
Will increased frequency attract more riders in off-peak hours?

City and Neighborhood Planning
Which neighborhoods lack access to grocery stores?

City Operations
When should we schedule water main repairs?

Parks, Recreation, and Facility Management
Who is visiting our facilities?

Health and Human Services
Which neighborhoods encourage active transit?

Favoriser l'émergence et l'adoption opérationnelle de **communs**

pour **construire** des mobilités durables, efficaces et inclusives

pour toutes les parties prenantes de **l'écosystème**
