Innovative tools and strategies for linking mobility information services in a decarbonised Alpine Space

Project Partners

Facts & Figures

Programme priority 2: Low Carbon Alpine Space
Programme specific objective (SO2.2): Increase options for low carbon mobility and transport
Project start: 01-10-2019
Project end: 30-06-2022
Countries: Austria, France, Germany, Italy, Switzerland, Slovenia
Partners: 14
Observers: 19

How can cross-border travel information in the Alpine Region be improved?

Cross-border travelling often faces the problem that travel information for the entire route is not visible at a glance. In most cases, travellers have to switch between the information systems of the different operators, regions or countries in order to plan their entire journey.

The LinkingAlps project addresses this problem in the Alpine Space (AS). The aim is to create a standardised exchange service of travel information between the individual travel information service providers. In this way, information can be exchanged between different systems and compiled into a continuous travel chain. Travelers can thus view the entire trip from start to destination on a single service.
